

Wayfarer Records Album Release

For immediate release: Wayfarer Records is set to release *Comet's Dust* by Austin, Texas-based electronic composer **JJ Rey (Ambiente Solstice)** on August 12th, 2022. *Comet's Dust* is available through all major download and streaming services.

JJ Rey is primarily known for his work in the Ambient music genre. His compositions are introspective lullabies and ethereal meditations of shifting harmonies that create colorful tapestries of mood. His three previous albums, *Abandoned Peace*, *Living Water*, and *Cloud Watch with Me*, in 2021, and *Falling into Sleep* in 2022, have been widely successful. He returns now with *Comet's Dust*, a new studio album inspired by a comet's journey through our celestial backyard. *Comet's Dust* is his first album on Wayfarer Records.

Comet's Dust is his most ambitious and boundary-pushing work thus far. This full-length studio album features lush warm expanses that give way to undulating textures and the building of epic waves of sonic aural joy. The listener is sure to enjoy the introspective and mediative journey that *Comet's Dust* takes them, like an ageless cosmic voyager traveling through our solar system.

Barcode: 1 97085999975

Cat # 08122022-52

Release Date: 08/12/2022
